

## **REPORT OF PROJECT WORK BY THE STUDENTS OF THE** **DEPARTMENT OF EDUCATION**

The syllabus for Education Honours includes a practical work from 2001.

Paper VIII Group B carries 50 marks for this.

There are two parts of the practical work.

1. The students collect data from our college with minimum sample size 50. Mainly they take the achievement test scores of the last final examination. Two sets of data are to be taken . They usually take two sets of marks for two papers of the same candidate and compare statistically. As the students take different sets of marks the data is unique for each student. Collecting data from 50 students they are to determine central tendencies, standard deviation, and the graphical representation of the data interpret the result .They are to determine the types of association between two sets of data by drawing scatter diagram.

2. The second part of the practical work is psychological experiments.

Students determine memory span, Index of complete learning/capacity of memorization ,comparison of recall and recognition as mode of measuring recall and recognition.

All these experiments are done individually and subjects are chosen from their peer group.

They are taught to interpret data graphically.
