

PROGRAMME: B.A. DEGREE COURSE (CBCS)
STATISTICS GENERAL

Program Specific Outcome

The students graduating with the degree B.Sc.(General) Statistics will be equipped with different concepts of statistics along with the tools required to implement them. As with each paper there is a practical component, so it will help students in developing the exploratory side and interpretation abilities. Further introduction to the software (R programming) will help them in analysis of data, irrespective of the volume, emanating from real life situations and thus paving the way for the development of analytical skills too.
