Annual Report (2021-2022)

The library is totally aware of the need of modernization of library services. A bibliographical database of the books, and a database of the users have been created following Koha, a library management software, in cloud through the server of the Bengal Library Association.

Books in regular use have already been bar coded. At the same time RFID technology has also been introduced from the academic session 2019-2020 with the aim of moving forward towards modernization in near future.

All other library routine works are also computerized.

Internet searching facility is provided to the users.

The college library is a member of UGC N-LIST Consortium and library members can have access to the e-resources enlisted in this programme.

Problem

The library faces acute space problem which is the main obstacle for any kind of library extension work.
